# THE DEVELOPMENT OF A FINITE ELEMENT PROGRAM TO MODEL HIGH CYCLE FATIGUE IN ISOTROPIC PLATES

Biblioscholar Okt 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x7 mm. This item is printed on demand - Print on Demand Neuware - As part of a joint AFRL-DAGSI turbine blade research effort, a computer program has been developed that uses a von Karman large-deflection two-dimensional finite element approximation to determine stress levels and patterns in isotropic thin plates. The dynamic loading of various plates has been carried out in order to model a high cycle fatigue situation. The research considered...

## Reviews

*This is an amazing ebook that we actually have possibly read. I have go through and i am certain that i am going to going to read yet again again later on. I am just easily could possibly get a delight of looking at a composed pdf.*

-- **Emilio Nietzsche V**

*If you need to adding benefit, a must buy book. It is actually rally interesting throug reading time period. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Olen Mills**
