Daya Publishing House/Astral International (P) Ltd., 2002. Hardcover. Book Condition: New. The book has been written covering applied aspects of hydrobiology in order to cater to the needs of students and teacher in Indian universities and colleges. A textbook of this kind will be of immense use of all those who study or teach a special course in aquatic biology or as part of their curriculum. To start with the book in order to explain the relationship of the hydrosphere with other components of the ecosphere, a chapter on biosphere is incorporated as Chapter 1.; Various physico-chemical properties of water and their interaction with the environmental factors and the responses of organisms to their physical environment are narrated in Chapters 2 and 3 respectively. During the 1990's there was a mad race to convert the paddy field and mangrove swamps into aquaculture ponds to grow the tiger prawn and earn money along the both coasts of India, specially in Andhra Pradesh. The Coastal Zone Regulation Act 1992, posed stringent measures and the EIA was extended to aquaculture also. Now all the aquaculture ponds with more than 20 ha area are to be scrutinised by EIA before establishment. The importance of ecology and status of mangrove ecosystems of India is included in Chapter 4.; Another important aspect of aquatic biology is study of interstitial and intertidal organisms. There is very meagre information available on these topics. With a view to discuss this the topics are dealt in Chapter 5 and 6. Another most fascinating avenue yielding field is pearl culture. In India aquaculture scientists are now producing indigenous pearls using modern techniques. Details about the pearl culture practised and its status is described in Chapter 7.; Chapter 8 embodies information of drift animals and phytoplankters. Pollution problem is a global concern. The water pollutants,...
